

# *KPIT*

AUTOSAR Startup Sequence

# AUTOSAR Startup Sequence

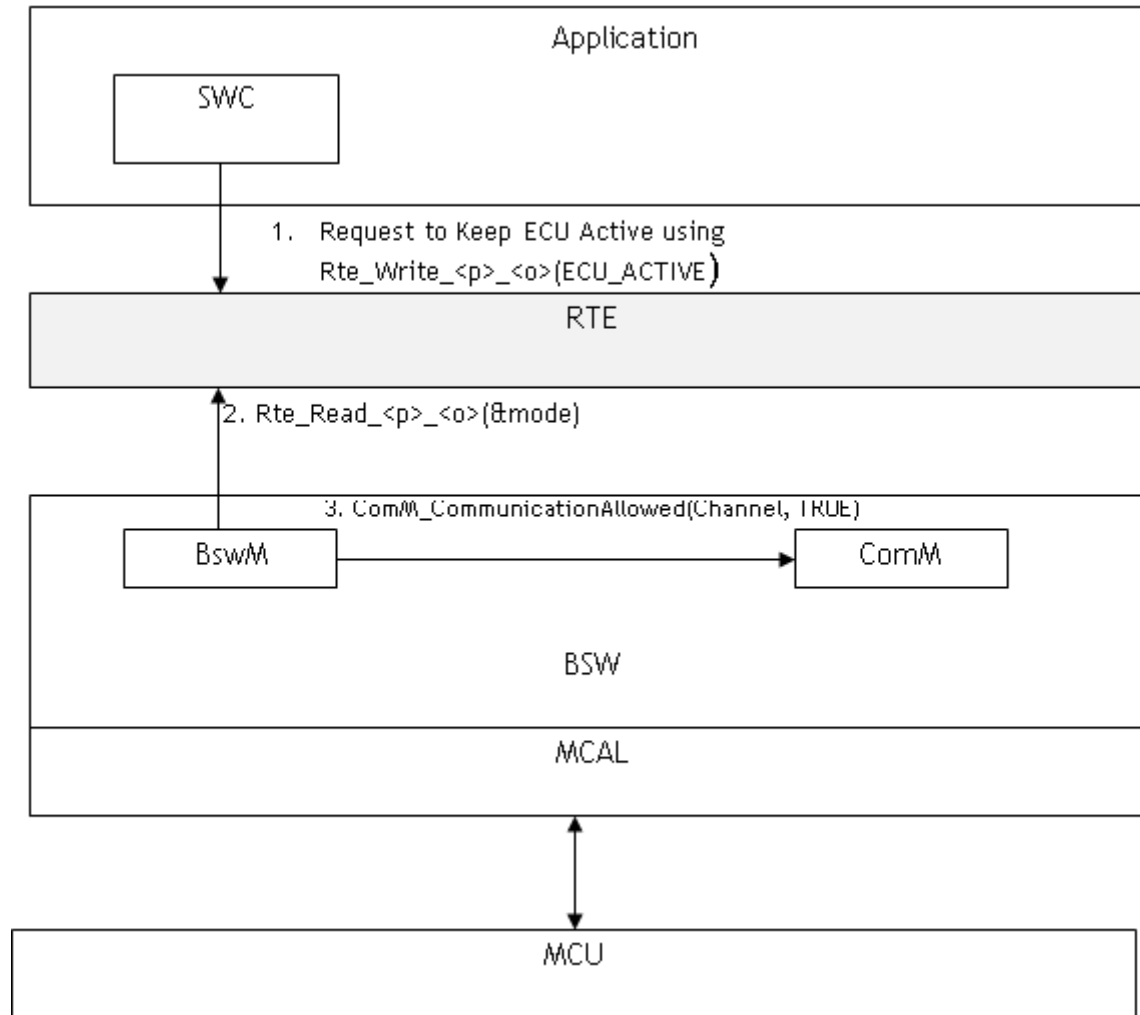

# AUTOSAR Startup Sequence (contd.)

## Note:

\*If Memory stack is present in the system, care should be taken by the integrator to initialize NvM and then invoke NvM\_ReadAll. Then other BSW modules which has dependency on NvM (say Dem, ComM, etc.,) shall be initialized. Lastly, Rte and Applications shall be initialized.

# Mode Management example

# Thank you
